

REPORT DANIELE NIEDDU – ESERCIZIO 13/09/2024

L'esercizio consisteva nel settare gli IP statici alle macchine virtuali e in seguito effettuare un ping da una macchina all'altra per vedere se queste riuscivano a comunicare tra di loro. Di seguito gli screenshot dell'avvenuta comunicazione tra kali e metasploitable2

```
Metasploitable2 [In esecuzione] - Oracle VM VirtualBox
Macchina Visualizza Inserimento Dispositivi Aiuto
